

NATIVE PLANTS THAT SHOULD DO WELL ON HILLSIDE SLOPES

Queen Ann's Lace	Wild Daisy	Amelanchier
Milkweed	Viburnum	Sumac (low growing)
Day Lilies	Juniper	Burning Bush Euonymus
Spirea	Canadian Yew	Golden Rod
Crown Vetch	Mugo Pine	Black Eyed Susan
Box Wood	Butterfly Weed	Bearberry
Ferns	Hosta (non-native)	Lavender (non-native)
Serviceberry (non-native)	Forsythia (non-native)	

GRASSES / GROUND COVERS FOR HILLSIDE SLOPES

Big Blue Stem	Little Blue Stem	Chickory
Little Blue Fescue	June Grass	Fountain Grass
Lily of the Valley	English Ivy	Lirarope Spicata
Sideoats Grama	Switchgrass	Prairie Cord Grass
Prairie Bluestem	Prairie Dropseed	Bottlebrush Grass
Indiangrass	Purple Lovegrass	Vanilla Sweet Grass
Canada Wild Rye	Northern Sweet Oats	Junegrass
Ivory Sedge	Bur Sedge	Palm Sedge
Plantain Leaved Sedge	Pennsylvania Sedge	Eastern Star Sedge
Long Beaked Sedge	Fox Sedge	

PLANTS FOR STORM WATER DETENTION PONDS

Wild Iris	Blueflag	Potentilla
Wild Buckwheat	Scirpus	Aster

HINTS TO HELP WITH THE PLANNING AND CARE

1. Maximize potential: fertilize the planting holes; pick best species for our soils; make hole size adequate; light mulching is important - cover the root ball.
2. Do not fertilize too much the first year.
3. Mulch about one inch thick for an area about one foot in diameter around each plant.
